HOW SECURE IS YOUR DATA?

Going online lets you keep learning and connect with friends and family. However, just as you lock your doors you should take precautions before using the internet to be sure you can get the most out of being online. Your mobile devices – including smartphones, laptops and wearables – are always within reach everywhere you go, and they share substantial information about you and your habits. Come to the library to find out how to maintain your privacy in the digital age!
